

POLYCARBONATE MIRROR FACE CLEANING GUIDE

The Convex Mirror Shop UK recommend cleaning their polycarbonate mirror faces with soap and water and then with a clean, soft, lint free, damp cloth. Use a non-abrasive polish, such as Johnson's Pledge or Mr Sheen for a clear bright reflection.

Saturate a clean soft cloth with polish, then spray the mirror face with polish. Wipe the wetted cloth over the mirror surface. With a another clean dry cloth buff the mirror face until it is clear of polish.

DO NOT USE:

- abrasives
- acids
- solvents such as petrol and laquer thinners

Graffiti Removal:

Any graffiti should be removed from the mirror face as soon as possible and preferably within 24 hours. To remove graffiti, use a non-abrasive substance such as "De-Solv-it Graffiti Remover". Not all graffiti cleaning agents are suitable. Failure to use an approved cleaning agent may damage the mirror surface.

Powder Coated Frames:

Do not use harsh cleaning products or products that will leave a residue, as this will damage the powder coating which protects the frame.
